

HTD189: TWIN CAM STARTER KIT FOR 2006-UP DYNA  
INCLUDES 76 PIECES

**HOT TOPPERS® are manufactured to fit American Standard fasteners.**

**There are some rare occasions where even though the nut or bolt is an American standard fastener, the Hot Topper® may not achieve a friction fit. In this case we recommend using a Napa clear silicone (Napa Auto part # 765-1481) to achieve a secure fitment. DO NOT USE ADHESIVE PRODUCTS to mount Hot Toppers®. The Napa product we recommend will allow for an easier removal if service is performed. We simply fill our cover with the necessary amount of silicone to achieve a firm hold on the fastener, yet beware that the silicone will expand when it sets up, so don't over fill our part. A little less goes a long way. Please email [info@hottoppers.com](mailto:info@hottoppers.com) or call our toll free USA number 877-446-8867 with any questions or comments.**

HTD100	13	Around the primary cover
	1	Crankshaft position sensor bolt in front of cylinders next to oil filter
	6	Right side clutch release cover
	1	Beneath starter, speed sensor mounting bolt
	1	Right side in front of clutch release cover on oil dip-stick housing
	6	On upper transmission housing cover bolts
	10	Cam cover bolts right side
	8	Lifter cover push rod bolts right side
HTD200	6	Right side around transmission clutch release cover on transmission housing
	1	Left side inner primary cover to engine case mounting bolt (below ignition coil)
HTD288	8	<b>SILICONE</b> on rocker cover bolts, requires a few drops of <b>SILICONE</b> on stem. When pushing them on you should feel a "click" when they engage properly
HTD311	6	On left side on engine case bolts under cylinder heads
HTD500	4	Lower front motor mount bolts on front engine mount bracket
HTD600	2	Left side of lower front motor mount nuts
	3	Both sides upper and right side lower engine to transmission bolts
