HOT TOPPERS® are manufactured in the USA to fit American Standard fasteners. There are some rare occasions where even though the nut or bolt is an American Standard fastener, the Hot Topper® may not achieve a friction fit. In that case simply install a drop of silicone on the inside wall of the Hot Topper® using Napa® part number 765-1481 clear silicone or facsimile.

The V-ROD features metric fasteners. All of the Hot Toppers® in this kit REQUIRE SILICONE!

Please DO NOT USE adhesive products to mount HOT TOPPERS®. The Napa® product we recommend will allow for an easier removal when service is required. We simply fill our cover with the necessary amount of silicone to achieve a firm hold on the fastener, yet beware that the silicone will expand when it sets up so don't over fill our part. A little dab goes a long way.

Before you begin this easy installation process we suggest you completely wash and dry your motorcycle, especially the fasteners to be covered.

Note the accompanying diagram that calls out the part number of each Hot Topper® mounted on the adhesive patch. Start the install process with the smallest HOT TOPPER® - the HTD100. As you install them note the size and style of the other zinc original uncovered fasteners.

PART #	QTY	LOCATION OF PART
HTD100	1	Under lower triple tree <u>NO SILICONE REQUIRED</u>
	2	Right side on starter motor body screws
	2	Right side by thermostat housing (1), Front of rear cylinder (1)
	4	Replace button T-25 torq bolts in clutch and brake lever perch bolts with supplied 1/4 x 20 x 1 allen bolts. Push on Hot Toppers®
	4	Replace torq bolts in front fender that hold chrome cover on with 1/4 x 20 x 1/2 allen bolts and 3/16 nuts. Push on Hot Toppers®
HTD200	12	Rocker box bolts
	14	Primary cover
	2	On left (1) & right (1) side louvered plates at steering stem
	13	Cam cover
	3	Clutch cover
	2	Starter motor mount bolts
	7	Right side on water pump cover
	2	Right side on top of thermostat housing
	2	Above rear shifter linkage arm
	1	Left side above engine oil drain
HTD211	2	Left (1) and right (1) backside of radiator to mounting bracket bolts
HTD220	4	Snip stems and mount in recessed allens in front fender support bolts on left & right side front forks
	2	Snip stems and mount in derby cover
	4	Left (2) & right (2) side, Snip stems and mount in front brake calipers
HTD265	4	Mount on upper and lower left (2) and right (2) side of triple tree
	10	Left (5) & right (5) side mount on torq bolts on front brake rotor
	5	Mount on torq bolts on rear brake rotor
	4	Left (2) & right (2) side footpeg to frame mounting bracket bolts
